DWE7485-QS Sierra de Mesa 1.850W Ø210mm

£538.95 4.6★

1. **Festool 491498 FS 1400/2 Guide Rail** — £129.98, 4.6★ The Festool Guide Rail is a precision tool that enhances the accuracy of your cuts when used with a compatible circular saw. While it doesn't cut materials on its own, it excels in creating straight, clean cuts, especially when handling large panels of plywood or MDF. However, it lacks the versatility of the R210SMS+ since it cannot cut metal or plastic. Choose this if your projects often require precise, straight cuts on larger sheets, and you already have a suitable circular saw in your workshop.

2. **DWE7485-QS 1,850W Table Saw** — £538.95, 4.6★ The DWE7485-QS is a powerful table saw offering a larger cutting capacity and greater stability for larger workpieces. Although it comes at a premium price, its 1,850W motor provides robust performance for both hardwood and softwood. However, it lacks the portability of the R210SMS+, making it less ideal for on-site jobs. This option is perfect for those who have a dedicated workshop and require a more versatile cutting machine for larger projects but are willing to invest significantly more.

3. **Evolution Power Tools R255SMS+ Compound Mitre Saw** — £209.95, 4.6★ An upgrade within the Evolution range, the R255SMS+ boasts a larger 255mm blade and a 2000W motor, allowing for deeper and wider cuts. It retains the multi-material cutting capability of the R210SMS+, but at a higher price point. This saw is a better choice if you frequently work with larger stock or require increased power for tougher materials. While it’s heavier and less portable than the R210SMS+, it offers enhanced capabilities for serious woodworkers.

4. **Einhell Dual Bevel Sliding Mitre Saw 1800W** — £110.00, 4.4★ The Einhell model is an affordable alternative, featuring a dual bevel function and a 48-tooth blade for smooth cuts in wood and coated boards. At 1800W, it offers decent power for DIY projects but falls short in long-term durability compared to the Evolution saw. Opt for this model if you are on a budget and primarily work with softer woods or plastics and don't mind a trade-off in performance and longevity.

5. **Einhell Compound Mitre Saw 1600W** — £69.95, 4.4★ The most budget-friendly option, this Einhell saw is simplistic and easy to use, making it ideal for beginners or those who require a tool for occasional use. With a cutting speed of 5000rpm, it performs well for light-duty tasks but lacks the robustness and multi-material capabilities of the R210SMS+. Choose this if you are a novice woodworker or just need a basic mitre saw for light home projects without breaking the bank.

Still Buy the Original If...

If you require a reliable, versatile saw for both wood and metal, the Evolution R210SMS+ remains an excellent choice, especially given its balance of price and performance.
